About us

Welcome to Spes Medica

Spes Medica is an Italian company specializing in the production of electromedical devices. We offer our customers innovative solutions to be used in Neurodiagnostics, Intraoperative Monitoring, Cardiology and Physiotherapy fields. Thanks to our 18 years of experience and our collaboration with research organizations we were able to develop and consolidate our know-how.

Our goals

Building high quality products to improve the quality of diagnostic tests and therapies. Technology, continuous improvement and patient respect are the key concepts of our path to become a global reference company in the medical field.

High Tech Design

The R&D team, made up of qualified professionals, design and produce forefront medical devices by using the latest generation technology.

The intense and tireless research activity, strengthened by the experience of 18 years of production, characterizes our working method.

Creating high quality devices

The full range of Spes Medica products are manufactured at our plants in Italy. Spes Medica is committed to adhering to our policies on quality standards and safety. As a customer satisfaction guarantee we are certified for the Quality Management System according to ISO 13485 and 93/42/EEC. Our products are registered with CE, FDA, CFDA, Anvisa and many other international organizations.

Neurodiagnostics / EEG

Spes Medica offers a complete range of electrodes and accessories to be used during EEG, EP and ERG examinations. Our products have been developed to ensure maximum signal quality and patient comfort.

- Headcaps with Precabled Electrodes
- Subdermal Needle Electrodes
 - Cup Electrodes
 - Pastes and Gel
 - ERG Electrodes

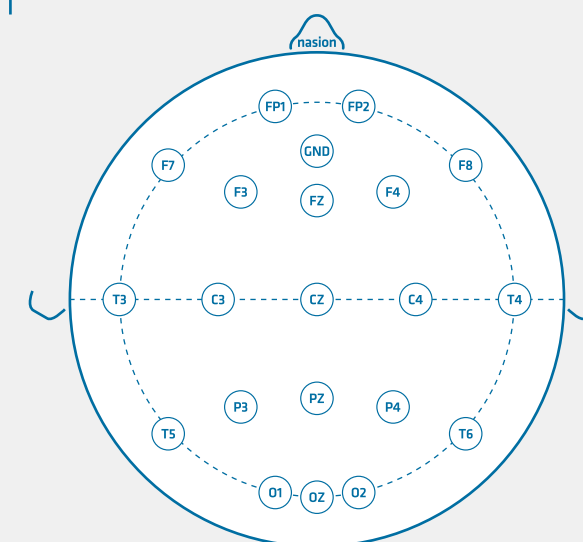

Placement systems / EEG

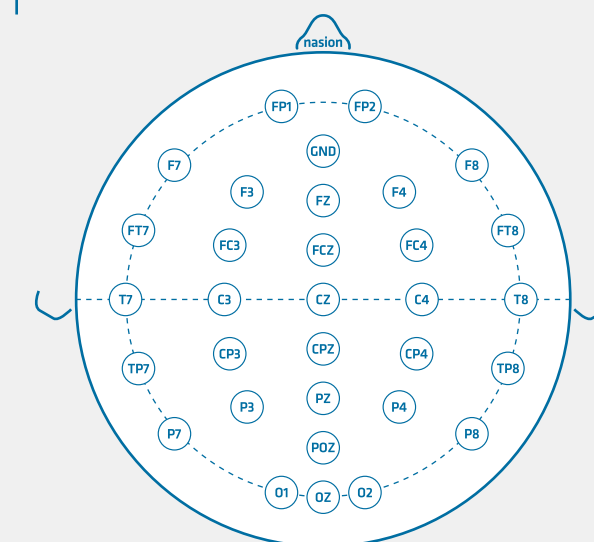

International 10-20 System

Our headcaps are made in accordance with the International 10-20 System. Spes Medica offers the possibility to customize the electrode layout up to a 128-channel application.

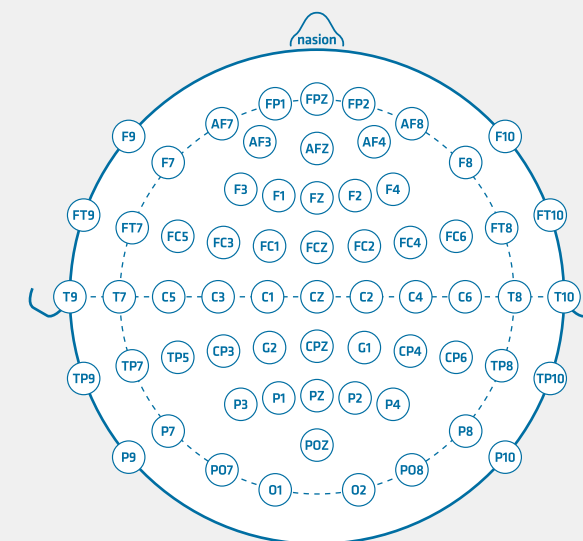

20 Electrodes Scheme

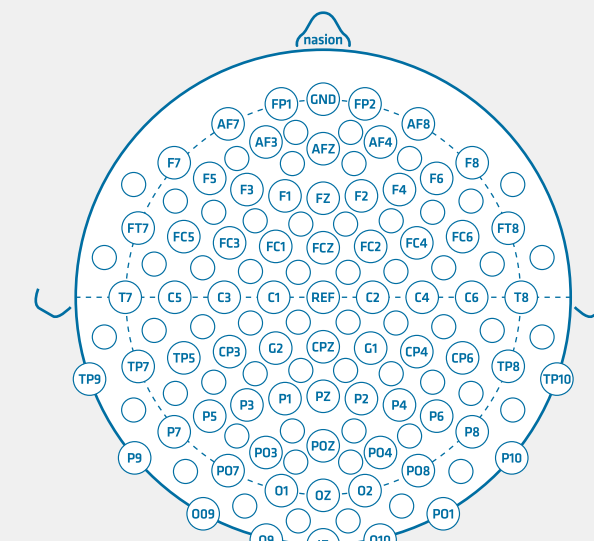

32 Electrodes Scheme

64 Electrodes Scheme

128 Electrodes Scheme

Materials

The electrodes on our headcaps are made of:

Tin

Sn

Silver/Silver Chloride

Ag Ag Cl

Silver/Sintered Silver Chloride

Ag Ag Cl Sint

Gold

Au

Connectors

We offer a wide range of connectors. Please find below the standard versions:

Touch Proof
DIN 42802

Sub-D 25

Sub-D 50

MDR

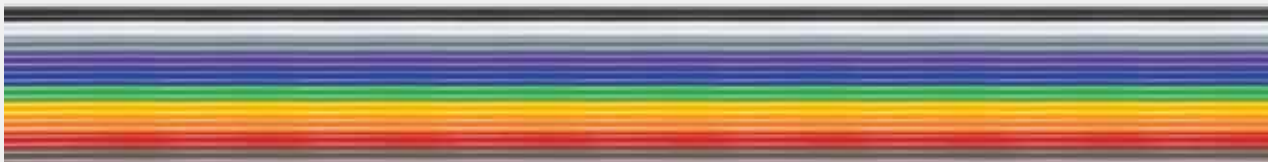

Further configurations are available according to your needs.

Cables

Spes Medica provides two different cable configurations:

Flat cables

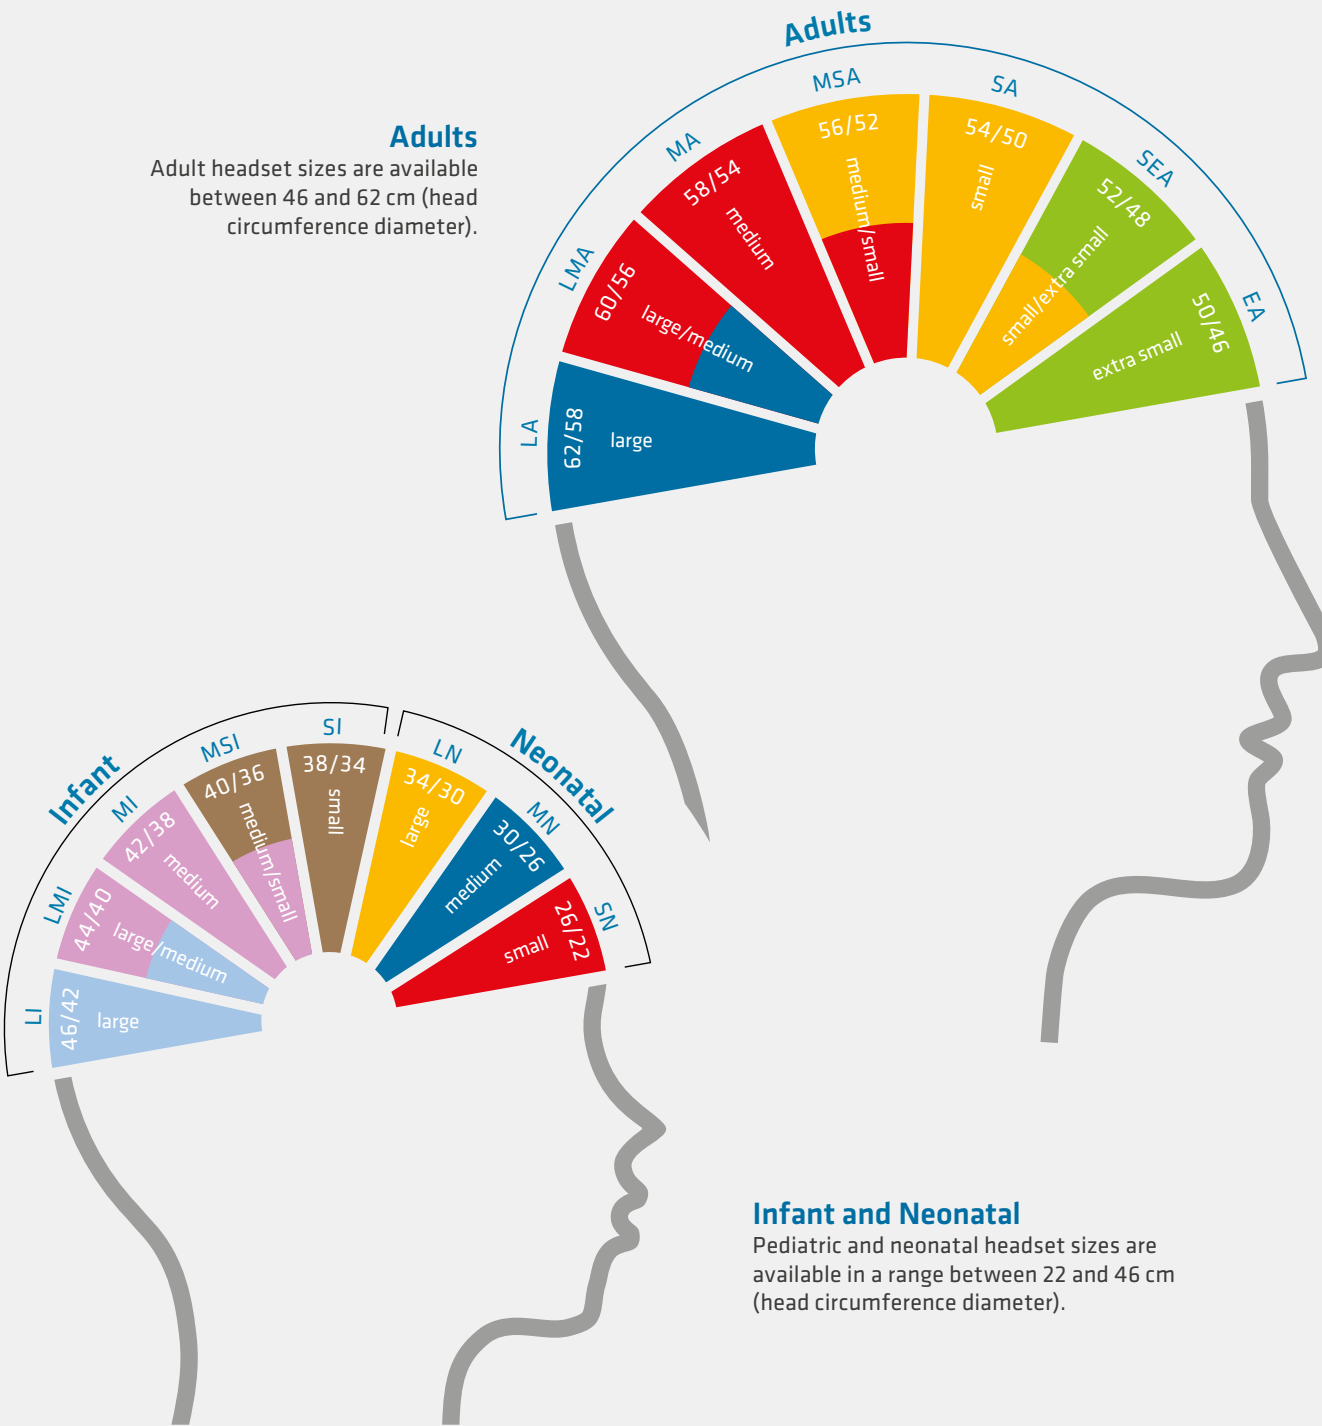

Twisted cables

Sizes

We offer numerous headset sizes depending on your patients needs.

EEG / Headcaps with Prewired Electrodes

Medcap

Pack of 10 connection cables are available in the following colors:

Support Band for Bridge Electrodes

- Composed on an elastic perforated band made of natural rubber.

Code	Size	Pack
HEAD000N	Neonatal	1 pc

Disposable Support Headcap

- Allows easy use of bridge electrodes and cup electrodes.
- Ensures uniform pressure without the use of the chin holder or chest bands.
- Guarantees the visibility of the skins integrity.
- Elasticity allows for use on different cranial circumferences.

Code	Size	Pack
D00000LA000	Adult Large (54 - 62 cm)	10 pcs
D00000MA000	Adult Small (46 - 54 cm)	10 pcs
D00000MI000	Pediatric Large (40 - 46 cm)	10 pcs
D00000SI000	Pediatric Small (34 - 40 cm)	10 pcs

Bridge Electrodes / EEG

Bridge Electrodes

- Gold screw guarantees high signal quality.
- Screw system suitable for correct positioning of the electrode on the skin.
- Universal connector suitable for 2 mm spring pin and crocodile clip.
- Bridge made of ABS plastic material.

Code	Electrode Material	Size	Bridge Color	Pack
BEAG00A2	AgAgCl	Adult	Red	10 pcs
BEAG00A7	AgAgCl	Adult	Blue	10 pcs
BEAG00P4	AgAgCl	Pediatric	Yellow	10 pcs
BEAG00N1	AgAgCl	Neonatal	No Bridge	10 pcs

EEG / Cup Electrodes

- Made of pure Ag 999.99 ‰ for the highest recorded signal quality.
- The Touchproof Connectors ensure a stable long-term connection to any type of equipment.
- The cable guarantees maximum resistance and flexibility.

Moulded

- Moulded cable-electrode connection ensures high mechanical strength during use.

Ø 6 mm

Sintered Electrodes

- Consists of a sintered disk moulded in an insulating material.
- Excellent signal quality guaranteed by the low impedance of the material.
- Made to ensure long-lasting recordings.

Code	Electrode Material	Cup Diameter	Length	Pack
DSTS102600	AgAgCl Sintered	5 mm	100 cm	10 pcs

Pack of 10 cup electrodes are available in the following colors

Spes Medica is active in the production and processing of pastes and gels for Neurodiagnostic applications. We offer products for the preparation and the treatment of the skin and for the proper registration.

Ac Cream

- Highly conductive and adhesive paste for long-lasting EEG recordings.
- Easily removable and washable.

Code	Description	Package	Pack
AC CREAM250V-3	Adhesive and conductive paste	Jar 250 gr	3 pcs
AC CREAM100V	Adhesive and conductive paste	Jar 100 gr	1 pc
AC CREAM050V	Adhesive and conductive paste	Jar 50 gr	1 pc

Neurgel

- Highly conductive gel.
- Guarantees low impedance and excellent signal stability.
- Reduces the risk of bridge effect between the electrodes.

Code	Description	Package	Pack
NEURGEL250V-3	Conductive gel	Jar 250 gr	3 pcs
NEURGEL250F	Conductive gel	Bottle 250 gr	1 pc

Neurprep

- New formulation suitable for skin preparation before EEG recording.
- Guarantees low impedance.
- Dermatologically tested for the most sensitive skins.

Code	Description	Package	Pack
NPREP120T-3	Degreasing gel	Bottle 120 gr	3 pcs
NPREP025T	Degreasing gel	Bottle 25 gr	1 pc

Everi

- Specific product for skin preparation before registration.
- Guarantees low impedance and increased adhesion of the electrode to the skin.

Code	Description	Package	Pack
EVERI160SPE-24	Degreasing gel	Bottle 160 gr	24 pcs
EVERI160SPE	Degreasing gel	Bottle 160 gr	1 pc

EEG / Pastes and Gel

Elefix

Adhesive and conductive paste for EEG and EP.

Code	Description	Package	Pack
ELEFIX-TS	Adhesive and conductive paste	Bottle 180 gr	10 pcs
ELEFIX-S	Adhesive and conductive paste	Jar 400 gr	3 pcs

Skin Pure

Abrasive paste to prepare the skin before an EEG examination.

Code	Description	Package	Pack
SKIN-PURE	Degreasing paste	Bottle 135 gr	2 pcs

EC-2

· Adhesive and conductive paste that ensures excellent adhesion of the electrode for long EEG recordings.

Code	Description	Package	Pack
SEC-2	Adhesive and conductive paste	Bottle 100 gr	10 pcs

Ten20

· Adhesive paste.

Code	Description	Package	Pack
10-20-4	Adhesive paste	Jar 114 gr	3 pcs
10-20-4T	Adhesive paste	Bottle 114 gr	3 pcs
10-20-8	Adhesive paste	Jar 226 gr	3 pcs

Nuprep

· Recommended gel for improving recording quality due to reduced impedance.

Code	Description	Package	Pack
10-30	Degreasing gel	Bottle 114 gr	3 pcs

Pastes and Gel / EEG

Electrogel

· Conductive gel recommended for EEG recording with different cup electrode models.

Code	Description	Package	Pack
E-9	Conductive gel	Jar 450 gr	1 pc
E-10	Conductive gel	Jar 905 gr	1 pc
E-11	Conductive gel	Jar 3630 gr	1 pc

Collodium

· Adhesive paste for long-lasting EEG recordings.

Code	Description	Package	Pack
COLLODION-5/LV	Low viscosity adhesive paste	Bottle 6,5 ml	20 pcs
COLLODION-5	High viscosity adhesive paste	Bottle 6,5 ml	20 pcs

Korsolex Plus

· Fluid disinfectant without aldehydes

Code	Description	Package	Pack
KORSOLEX 2L	Disinfectant	2 L	2 pcs
KORSOLEX 5L	Disinfectant	5 L	1 pc

Ivory

· Lotion for cleaning the EEG headcap.

Code	Description	Package	Pack
E-16-F	Emulsion	Bottle 700 ml	1 pc

EEG / Subdermal Needle Electrode

Neurodart - Subdermal Needle Electrode

- Guarantees excellent signal stability and non-traumatic insertion.
- Provides excellent recording and effective patient stimulation.

10 cables set          

Spes Medica provides a wide range of Polysomnography transducers, characterized by excellent signal precision and maximum long-lasting quality over time.

- Disposable Sensors
- Reusable Sensors
- Airflow Cannulas

Reusable Airflow Thermal Sensor

- Overmoulded in soft plastic probes for oronasal breathing recording.
- Made of flexible materials developed to ensure optimized patient comfort.

Code	Model	Size	Pack
AIRFA00300	Airflow 3 ways	Adult	1 pc
AIRFP00300	Airflow 3 ways	Pediatric	1 pc
AIRFN00300	Airflow 3 ways	Neonatal	1 pc
Touch Proof Ø 1,5 mm DIN 42802			
Cable Length 200 cm			
Available in 1 way, 2 ways or divided ways			

Disposable Airflow Thermal Sensor

Code	Model	Size	Pack
AIRFA0030D	Airflow 3 ways	Adult	3 pcs
Touch Proof Ø 1,5 mm DIN 42802			
Cable Length 200 cm			

Reusable Respiratory Effort Sensor

- Band is made with elastic and comfortable materials for increased patient comfort.
- Piezoelectric sensor.

Code	Model	Size	Pack
RESPA00000	Abdomen/Chest	Adult	1 pc
RESPP00000	Abdomen/Chest	Pediatric	1 pc
Touch Proof Ø 1,5 mm DIN 42802			
Cable Length 200 cm			

Disposable Respiratory Effort Sensor

- No need chest belt.
- Comfortable for children.

Code	Model	Size	Pack
RESPA000200	Abdomen/Chest	Adult	5 pcs
RESPP000200	Abdomen/Chest	Pediatric	5 pcs
Touch Proof Ø 1,5 mm DIN 42802			
Cable Length 200 cm			
Code	Description	Cable Length	Pack
BMDS00260R	Connection Cable for Disposable Respiratory Effort Sensor	60 cm	1 pc

Tremor Sensor

- Suitable for tremor analysis.
- The device is reusable.

Code	Recorded Signal	Cable Length	Pack
TREM000000	Tremor	200 cm	1 pc
Touch Proof Ø 1,5 mm DIN 42802			

Limb Movement Sensor

- Excellent patient comfort and long-lasting product over time.
- The device is reusable.

Code	Recorded Signal	Cable Length	Pack
LIMB000000	Limb movement	200 cm	1 pc
Touch Proof Ø 1,5 mm DIN 42802			

Reusable Snoring Sensor

- Converts snoring noises into an analogue signal.
- Ensures high quality recording in noisy environments.

Code	Recorded Signal	Cable Length	Pack
SNOR000000	Snoring	200 cm	1 pc
Touch Proof Ø 1,5 mm DIN 42802			

Disposable Snoring Sensor

Code	Recorded Signal	Cable Length	Pack
SNOR000200	Snoring	200 cm	5 pcs
Touch Proof Ø 1,5 mm DIN 42802

BMDS00260S	Connection Cable for Snoring Sensor	60 cm	1 pc

PSG / Bands, Sensor and Airflow Cannulas

Inductive Band

- Made with comfortable materials and equipped with an adjustable buckle for increased patient comfort.
- Easily washable.
- The device is reusable.

Code	Model	Connectors	Pack
9010	Inductive Band	Snap	1 pc
9101	Connection Cable	 Ø 1,5 mm	1 pc

Position Sensor

- The “Position Sensor” kit is suitable for PSG recordings in the following positions: prone, supine, left side, right side, standing and sitting.
- Includes an adjustable elastic band.

Code	Sensor	Pack
1561	Position Sensor AC	1 pc
1561-kit	Position Sensor AC	1 pc
1564V2	Position Sensor DC	1 pc
1561V2-kit	Position Sensor DC	1 pc
 Touch Proof Ø 1,5 mm DIN 42802		
Cable Length 200 cm		

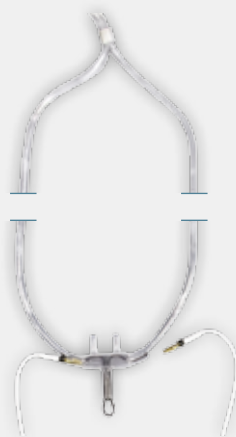

Thermocan

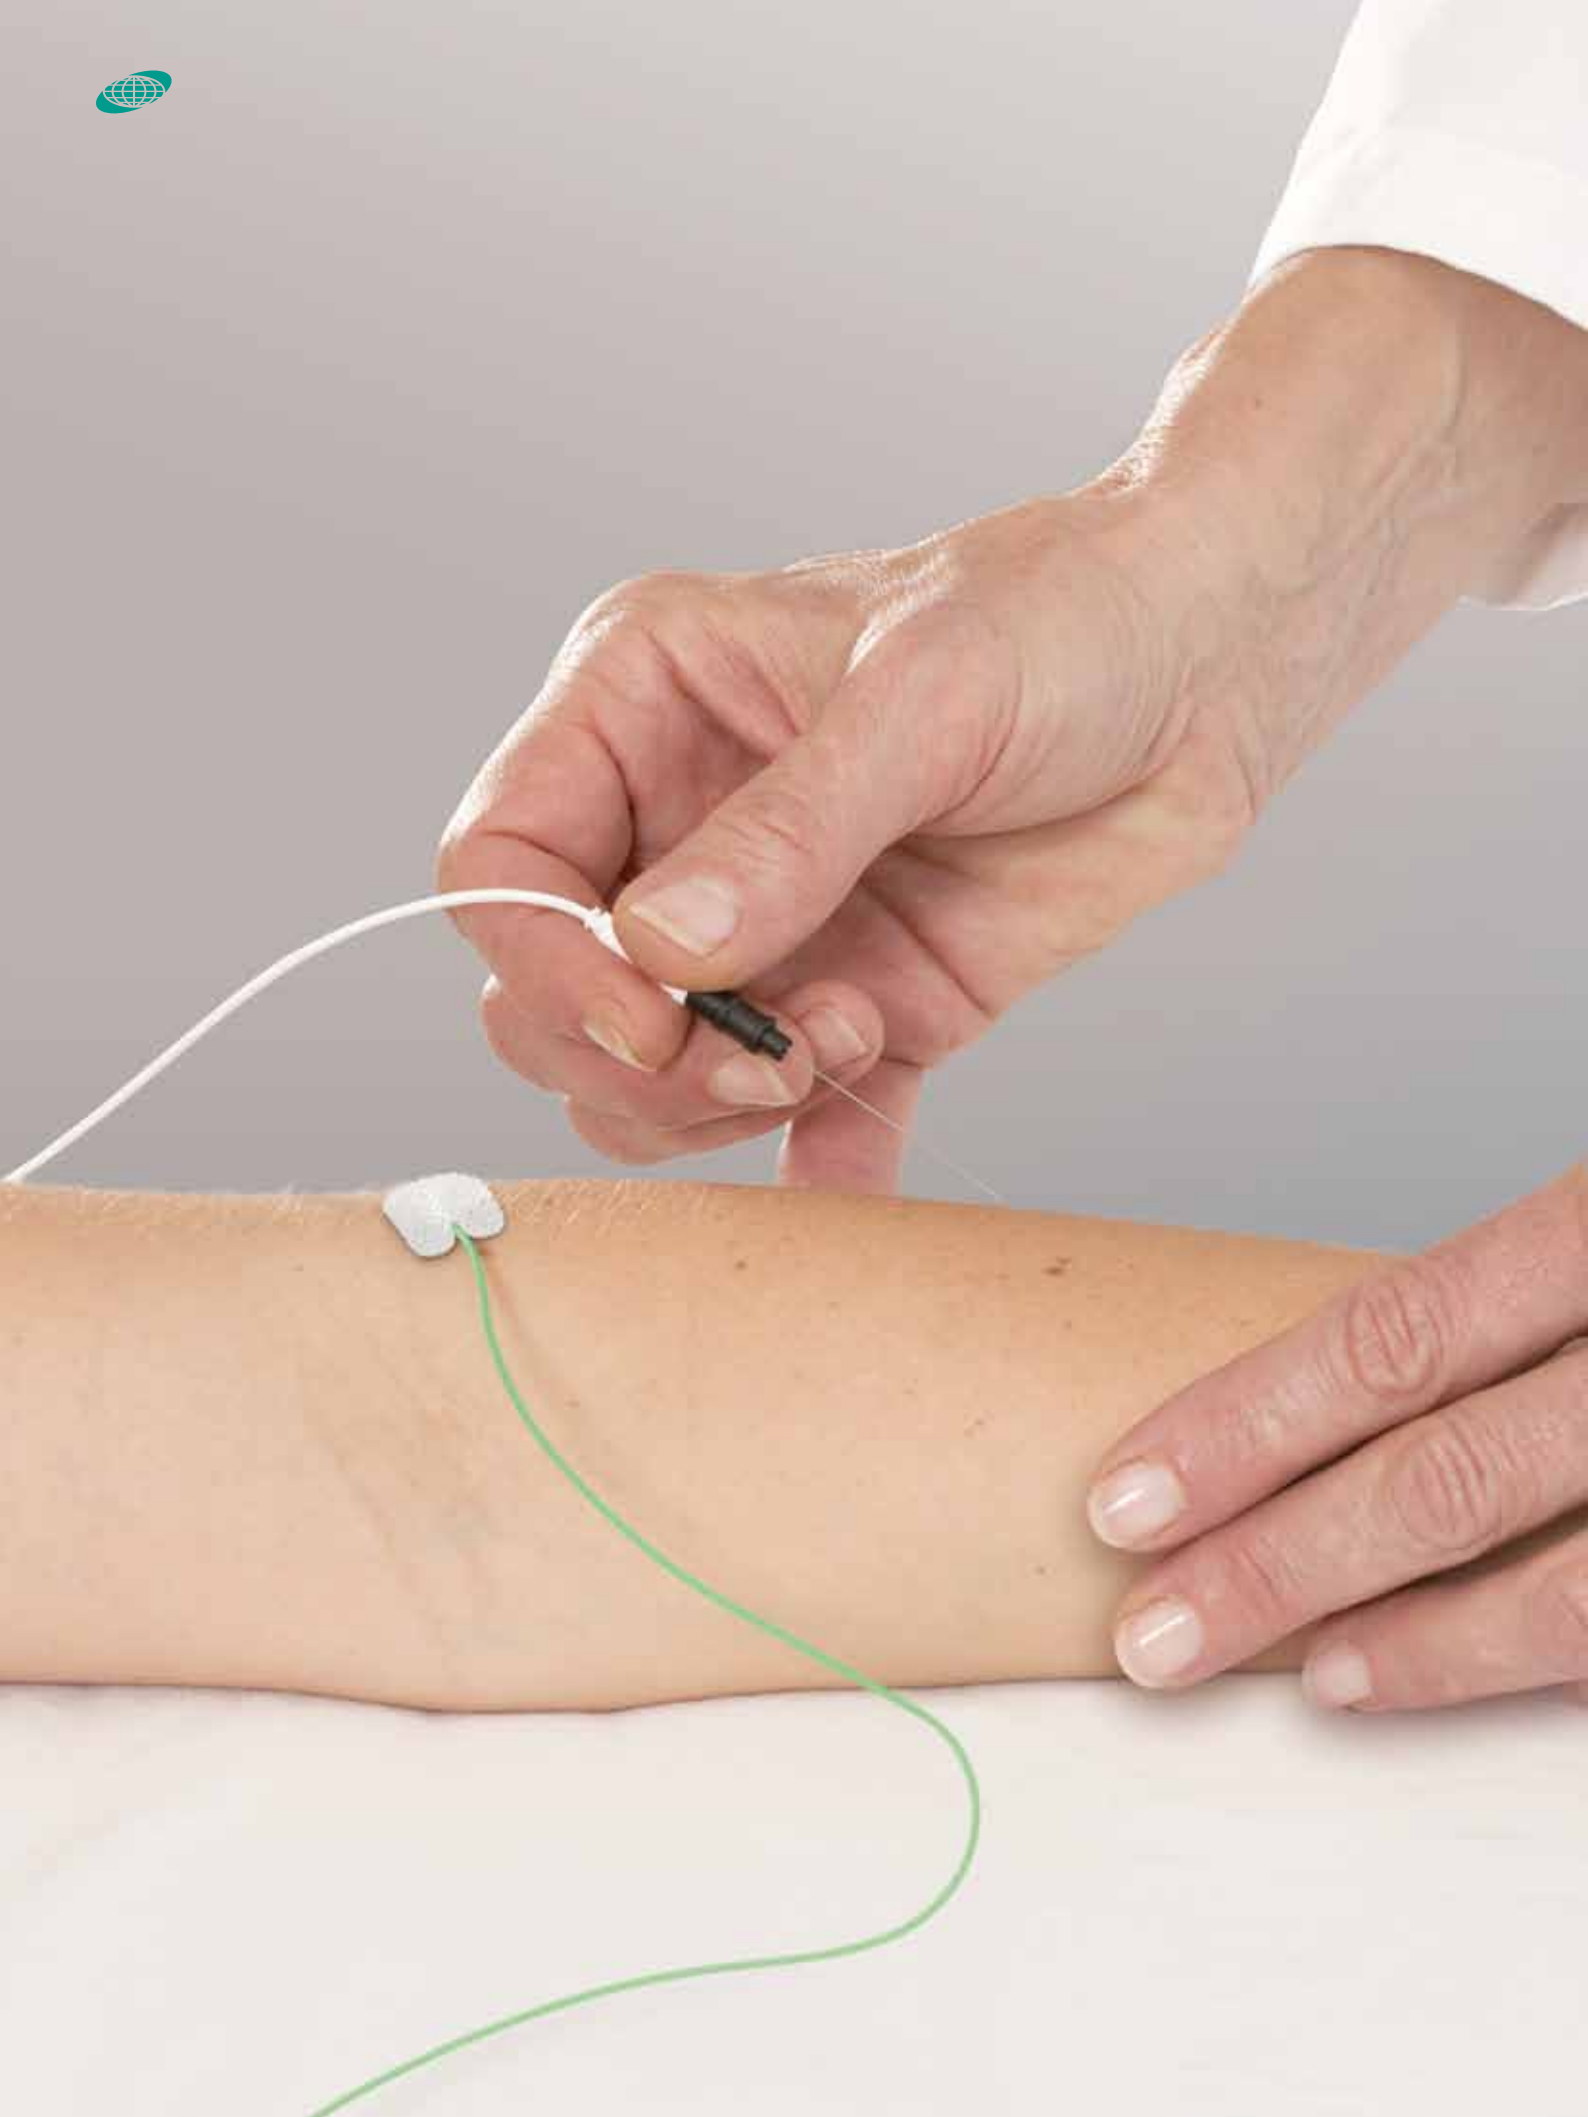

- Thermocan is designed with integrated thermistor that allows a high quality recording of thermal flow and pressure monitoring.
- The device is disposable and complies with current AASM standards for nasal and oro/nasal thermal flow monitoring.

Code	Size	Cable Length	Pack
15807	Adult	210 cm	5 pcs
15807-2	Adult	60 cm	5 pcs

Spes Medica is passionately focused on the study and the creation of a wide range of electrodes for EMG, NCS and PE. Thanks to our vast experience, we were able to develop excellent production techniques.

- Electrodes for Stimulation and Registration
 - Monopolar Needles
 - Single fiber Needles
 - Concentric Needles
 - Pudendal Electrodes
 - Adhesive Electrodes
 - Hook Wire Electrodes

EMG / Needle Electrodes

Upgrade +

MYOLINE - Concentric Needle Electrode

- Our new robotic sharpening provides excellent penetration of the needle and less trauma for the patient.
- Golden connector for best recording.
- 100% quality control on manufactured needles.
- Ergonomic handle with area indicator marker.

EMG / Adhesive Electrodes

Adhesive Electrodes

- Hydrogel guarantees excellent adhesion and repositioning even at different times.
- High quality recordings due to low impedance.
- Indicated for long-term testing.
- Hydrogel consists of biocompatible materials that has been tested on the most delicate skin types.
- Available in different shapes and sizes to allow ideal recordings even on smaller muscles.

Available with snap connectors and 4 mm plug connectors

AED / Defibrillation Pads

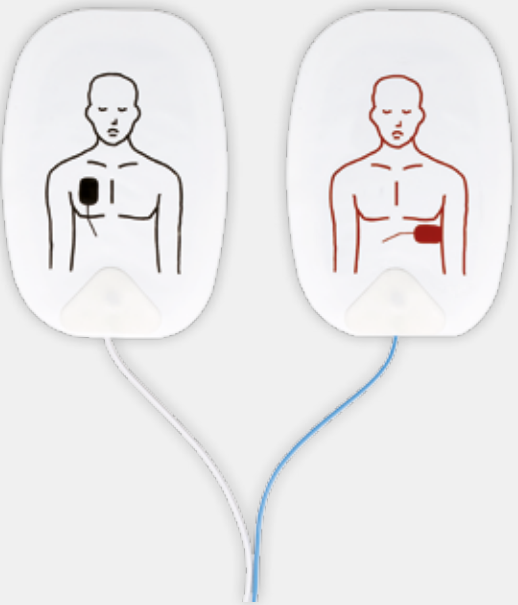

New

Defibrillation Pads

- The latest generation Hydrogel guarantees excellent adhesion and high electrical conductivity.
- Available in different configurations with different connectors and cable lengths.
- External connector allows for quick impedance checking.

Spes Medica is actively involved in the production of TENS, EMS, ECT and TDCS electrostimulation products to ensure optimal performance with all skin types and to ensure uniformity of electrical intensity on the whole electrode surface.

- Disposable Stimulation Electrodes
- Reusable Stimulation Electrodes
- Elastic Bands and Accessories

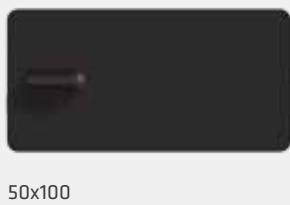

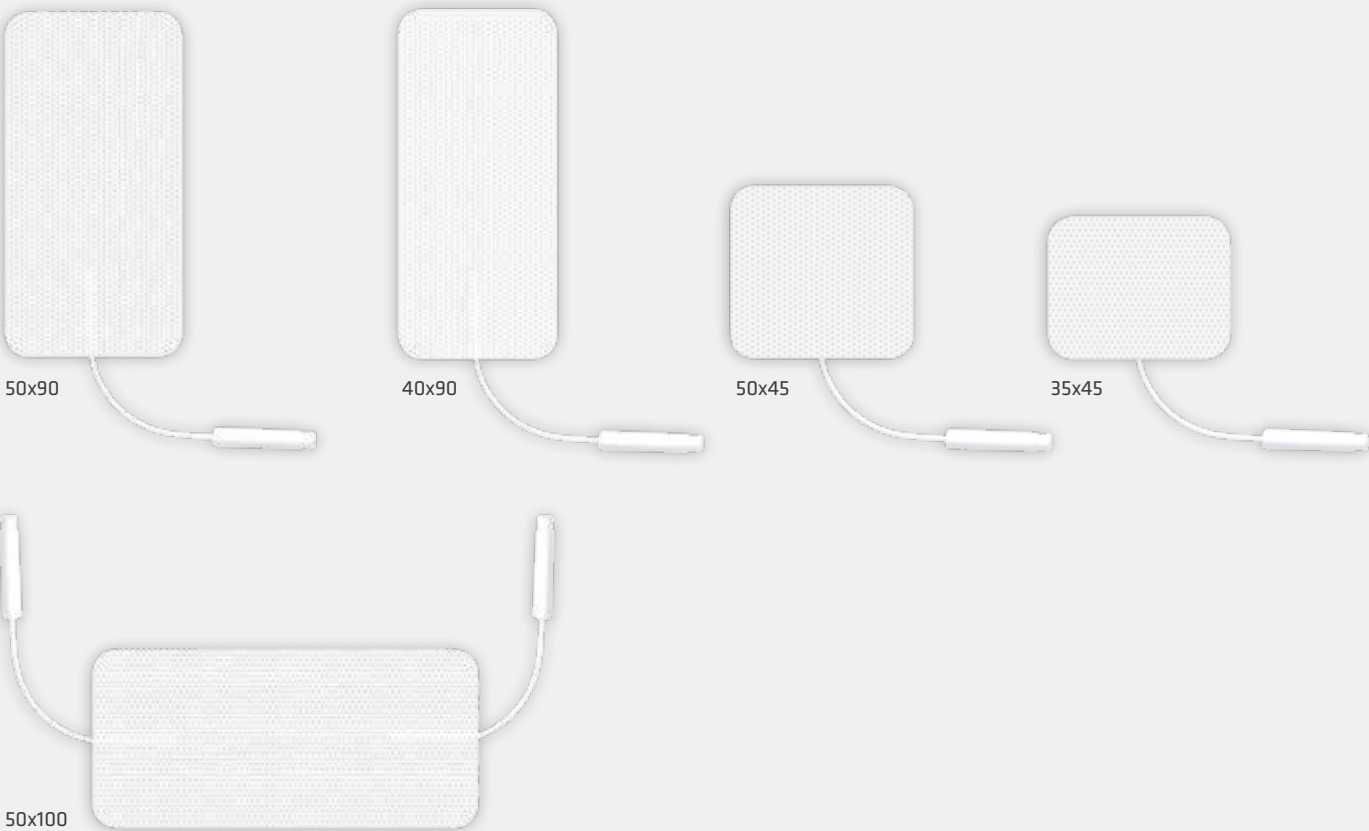

TENS / Stimulation Electrodes

Disposable Stimulation Electrodes

- Guarantees excellent electrostimulation performance.
- Hydrogel ensures excellent and constant adhesion to the patient's skin. This allows for uniform electrical intensity across the surface of the electrode. Hydrogel also allows repositioning of the electrode without reducing its adhesion.
- Hydrogel is very gentle so it can be applied on every type of skin, even the most sensitive ones.

Stimulation Electrodes / TENS

Reusable Electrodes

- Made of conductive silicone ensuring a uniform stimulating surface.
- Moulded cable-electrode connection to ensure high resistance during use.
- Available in different configurations with different connectors, including 2 mm and 4 mm universal sockets.
